

Nano Tag IR

Activation Guide

Prior to use, a Nano Tag IR must be activated. Once activated, it has a battery life of 14 days.

Step 1: Position the tag correctly

Important: ensures Blue LED is visible during activation

Front side is facing you

Back side the lettering is facing up

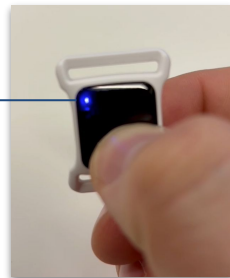

Step 2: Activate the tag

Place your **thumb on front bottom side** and your **index finger on the back side**.

Press and hold the back side firmly for **5 seconds**. You will **feel a click**, indicating the activation has started.

As you press and hold, **watch the front side for the Blue LED indicator flash** - confirms it's being activated.

No Blue LED flash? Release and try again. Once activated, the Blue LED will no longer flash.
